After a six-game losing streak, the Chatham-Kent Northmen (27-8-0) ended that streak with a 4-3 win over the Rouyn-Noranda Huskies (24-8-4) on Wednesday. Raphael Lavoie scored the game-winning goal with 1:01 left in regulation, and Northmen goalie Evan Fitzpatrick made 25 saves as the Chatham-Kent Northmen made a run at the Memorial Cup with a double-overtime win over the Huskies. The Northmen are looking to earn their first Memorial Cup appearance since winning in 2000. "We did it," said Northmen head coach and general manager Mike Sertich. "We made a run and ended up getting rewarded with a great win. We've been down with a team and are good at bouncing back. We've been working on that and it finally came through." Chatham-Kent

had been down 2-0, but moved in front in the second period. Northmen defenceman Jaiden Timmins deflected a shot off the boards and it went in off the right post at 6:01. Northmen forward Daniel Edgars (5) had a goal disallowed late in regulation because a play was made that resulted in a loose puck. Timmins (1) gave the Northmen the lead with a power-play goal at 14:28 in the second. Brett Gallant found Edgars, who made a quick move with his left hand to knock the puck into the net. Chatham-Kent got a goal back 1:30 later when Harry Melville (1) potted his 19th of the season. The puck was deflected in by Ryan 5b5f913d15

What's New in the?

Drawing Automation: Create drawings where all the geometry and the annotations are automatically generated from external datasources and stored in the drawing as annotations or linked to other existing annotation objects. (video: 1:39 min.) Importing and Linking Existing Designs: Create drawings from imported design data and link them to existing drawings automatically, either in the same file or in different files. (video: 1:29 min.) Export to PDF, JPG, PNG and more: Export your designs in a variety of formats, including PDF, PNG, JPG, BMP, EPS, SVG, SFF, and more. (video: 1:27 min.) Improved Icons: Interact with your design and create new objects more quickly, with more consistent look-and-feel. (video: 1:22 min.) Free Drawing Scale: Scale any design on the page in an instant. Use a custom scale factor or a reference object to quickly resize a drawing without recalculating geometry. (video: 1:20 min.) Improved Drawing Hierarchy: Easily navigate and interact with your drawings using the new user interface and the new hierarchical navigation tool. (video: 1:18 min.) More Part Numbers: The new AutoCAD part numbering tool lets you easily add, update, and link part numbers in existing drawings. (video: 1:20 min.) Powerful Integration: Quickly access your drawings from the web, cloud, mobile devices, and more. And thanks to easy integration with O&O Partner apps, you can easily generate print-ready PDFs and access related design information in Autodesk BIM 360 directly from within the app. (video: 1:24 min.) “You can see that we are very excited about this release,” said Philippe Lefebvre, chief design officer at Autodesk. “Whether you are a seasoned AutoCAD user or just learning how to use this industry-leading program, we are sure you will find lots of new features to make your designs even better.” A complete list of changes and new features in AutoCAD 2023 can be found on the Autodesk website and in our PDF guide, “Autodesk AutoCAD 2023.” Upcoming Events
